Vince & Gina, here are our responses to Lynn's comments for ETBE & TBA. For many of these (*'d), I have not asked them to start work on any of these yet – please advise which ones are priorities.

Hi everyone:

I am sharing a short list/brain dump of things I was keeping track of to shore up, etc.

I have been looking at these assessments with "NRC implementation, cancer descriptor, UF, and confidence rating" hats on and noticed a few things to share. I hope this is helpful....

Subject: IRIS Mgmt Council: agenda for Sept 16

Hello everyone – For Sept 16 (our first meeting since Aug 26), I'd like to follow-up on our remaining FY14 HHRA milestones. They are:

Step 1. Release lit-search/evidence-tables for BBP and DiBP

Step 3. Release t-Butyl alcohol, ETBE and RDX to interagency review

Step 4. Release Benzo[a]pyrene for peer review

We agreed on Aug 26 to try to make these (deferring n-Butanol and Vanadium pentoxide). I'd like for us to make any adjustments that are necessary to meet this goal.

Thanks. See you all Tuesday at 9,
Vince
